**Planning and Maintaining a Microsoft Windows Server 2003 Network Infrastructure (exam 70-293) - MCSE Certification Prep Program - 60 hours of instruction**

This Microsoft Windows Server 2003 MCSE Exam 70-293 training course provides students with an in-depth look at planning and maintaining a Windows Server 2003 Network Infrastructure. This is just one in a series of courses designed to build your knowledge as you work toward your MCSE or MCSA certification. The course will lay a solid foundation of knowledge required to take and pass Exam 70-293 beginning with a security overview designed to help you identify threats, risks and vulnerabilities and implement important security baselines. You'll also learn about NetBIOS names as well as implementing and enabling WINS clients. (Textbook required)

Financial Assistance  
may be available for  
those who qualify.  
Call (910) 938-6309  
for details.
